

DustPro

RoadPro

Dust Suppressant

RoadPro combines biodegradable, environmentally friendly polymer binders and complex wetting agents that are designed to both dampen and stabilise the surface particles of your road and unsealed surface.

Road Stabiliser

Stockpile Veneer

Binding Agent

Made from sustainable materials **RoadPro** is an easy to use water soluble concentrate that is added to your water cart as part of your regular Road maintenance.

RoadPro's unique formula works in 3 ways:

Water Penetration - **RoadPro** helps break the surface tension of the Road allowing water to penetrate deeper.

RoadPro Absorbs moisture from the atmosphere making Roads damper for longer and extending the watering cycle.

Binding Agent - **RoadPro** physically binds particles together, stabilising the Road surface and reducing dust.
